

Timeline

The timeline displays a list of events in chronological order.

Check out the latest remote job listings from the leading job board for designers, developers, and creative pros.

    <TimelineDot />
    <TimelineConnector />

```

Customization

Here is an example of customizing the component. You can learn more about this in the [overrides documentation page](#).

```
import Timeline from '@mui/lab/Timeline';
import TimelineItem from '@mui/lab/TimelineItem';
import TimelineSeparator from '@mui/lab/TimelineSeparator';
import TimelineConnector from '@mui/lab/TimelineConnector';
import TimelineContent from '@mui/lab/TimelineContent';
import TimelineOppositeContent from '@mui/lab/TimelineOppositeContent';
import TimelineDot from '@mui/lab/TimelineDot';
import FastfoodIcon from '@mui/icons-material/Fastfood';
import LaptopMacIcon from '@mui/icons-material/LaptopMac';
import HotelIcon from '@mui/icons-material/Hotel';
import RepeatIcon from '@mui/icons-material/Repeat';
import Typography from '@mui/material/Typography';

export default function CustomizedTimeline() {
  return (
    <Timeline position="alternate">
      <TimelineItem>
        <TimelineOppositeContent
          sx={{ m: 'auto 0' }}
          align="right"
          variant="body2"
          color="text.secondary"
        >
          9:30 am
        </TimelineOppositeContent>
        <TimelineSeparator>
          <TimelineConnector />
          <TimelineDot>
            <FastfoodIcon />
          </TimelineDot>
          <TimelineConnector />
        </TimelineSeparator>
        <TimelineContent sx={{ py: '12px', px: 2 }}>
          <Typography variant="h6" component="span">
            Eat
          </Typography>
          <Typography>Because you need strength</Typography>
        </TimelineContent>
      </TimelineItem>
    </Timeline>
  );
}
```

Alignment

There are different ways in which a Timeline can be placed within the container.

You can do it by overriding the styles.

A Timeline centers itself in the container by default.

The demos below show how to adjust the relative width of the left and right sides of a Timeline:

Left-aligned

09:30 am ● Eat

10:00 am ● Code
